EXPLANATIONS.

1. When places other than Cambridge or Massachusetts are named in the original records, they are given in the printed copy.

2. In all records the original spelling is followed.

3. The various spellings of a name should be examined, as items about the same family or individual may be found under different spellings.

4. Marriages are printed under the names of both parties. When a marriage appears without the intention recorded, it is designated with an asterisk.

5. Additional information which does not appear in the original text of an item, *i.e.*, any explanation, query, inference or difference shown in other entries of the record, is bracketed.

6. In taking records from gravestones it is often the case that the family name of a woman as given on the stone is not that under which she was born, so therefore many births will appear under a married name instead of the original one, which is not shown on the stone. Women are only mentioned as wives when they are so shown on the stone. In many cases names are evidently those of wives, though not so specified.
